[REDACTED] 25X1A9a

Concerning the Records Center Alarm and Water problems:

- a. Three additional units to strengthen the alarm system are to be installed and inspected for acceptance this week. [REDACTED] is withholding a \$68,000 payment until an acceptable system is in operation. 25X1A6a
- b. The attached memo from [REDACTED] states Office of Communications does not have funds available and action on the water problem will have to wait available [REDACTED] funds or year end funds. The [REDACTED] engineers feel the water is not a serious problem. Consequently, nothing has been done beyond the original proposal of 31 July. I believe [REDACTED] engineers and possibly the Commanding Officer did not fully appreciate the position or action requirement given them by the Office of Communications, Administration Officer. I suggest that it will be a sufficient stimulant if we call and inform him of the status quo and lack of planned action on the water problem. Would you wish to call him or shall I? 25X1A9a
